

It's great spending  
time with old friends...

# The Wellness Profile

## What is it?

The Wellness Profile is a new test for cats and dogs that detects the more common problems that can affect them as they get older. This simple, safe and cost effective test analyses your pet's blood for common signs of organ and body function, which enables your vet to better assess their overall health and wellbeing.

## Why do it?

Detecting and correcting problems early gives you and your vet the very best chance to prolong the life of your pet and maximise its health.

## Enjoy spending time with old friends...

Ensure your best friend receives the care it deserves by asking your vet about a Wellness Profile for your pet today.
